

Remote Desktop Connection Instructions

To improve performance and redundancy, and make sure that our users have a better experience with our systems, we now have four terminal servers as portals to our four Enterprise Systems platforms.

The IBM Academic Initiative members will need to use TS-IBM. waltoncollege. uark.edu. This portal has DB2 control center tools, QWS secure, RDz and SSH. To learn how to access this, please click the link below: http://enterprise.waltoncollege.uark.edu/Remote_Desktop_IBM.pdf

The Microsoft Enterprise Consortium users will need use TS-MEC. waltoncollege. uark.edu . This portal has SQL Server 2008 tools and Business Intelligence Development Studio. To learn how to access this, please click the link below: http://enterprise.waltoncollege.uark.edu/Remote_Desktop_MEC.pdf

The SAP University Alliance users will need use TS-SAP. waltoncollege. uark.edu . This portal has latest SAP GUI with all available SAP systems. To learn how to access this, please click the link below: http://enterprise.waltoncollege.uark.edu/Remote_Desktop_SAP.pdf

The Teradata University Network users will need use TS-TUN. waltoncollege. uark.edu . This portal has Teradata SQL Assistant, Teradata Warehouse miner. To learn how to access this, please click the link below: http://enterprise.waltoncollege.uark.edu/Remote_Desktop_TUN.pdf

If you have any questions or need any assistance on this please email the Enterprise Systems Team at EntSys@uark.edu.
